Probe type Tunable Diode Laser Spectrometer TDLS8100/TDLS8200

# Easy install, the best just got better

Yokogawa's new probe type TDLS greatly reduces installation costs.

- Easy installing probe type
- Long-term stable measurement realized by excellent probe design
- Intuitive touchscreen HMI
- Fully field repairable with 50 days of data and spectra storage
- Hazardous area classification Zone1 / Division 1

## Management

Yokogawa TDLS8200 simultaneously measures multi-gas like O<sub>2</sub>, CO, and CH<sub>4</sub>, providing, FAST, quick and reliable information to achieve;

- Combustion Efficiency Improvement Safety Improvement • Longer Life time of the coils and coil hangers

- Higher throughput thru optimizing heating

### Limiting O<sub>2</sub> Concentration for safety and process monitoring & control

- - No Sampling system required so less maintenance
  - Fast Response Analysis

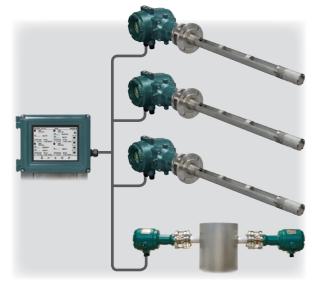

## System Configuration

- Standard System configuration
  - LCD display for process parameters and system status
  - HART communication available

#### System configuration with HMI

- Up to 4 units connection available
- TDLS8000 mixed system available

#### **Easy installation**

#### Access on one side only

• One flange only: no alignment required

Easy replacement of existing analyzer

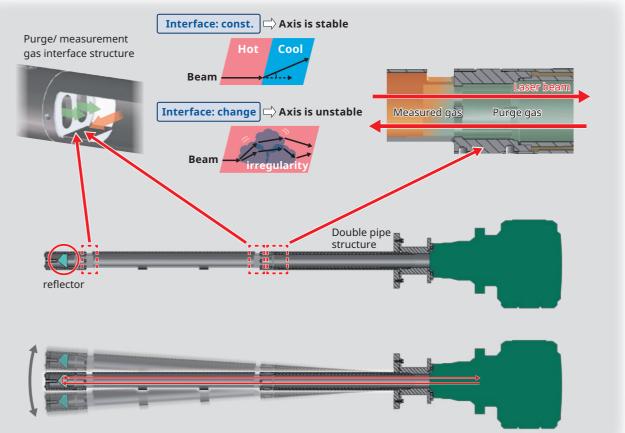

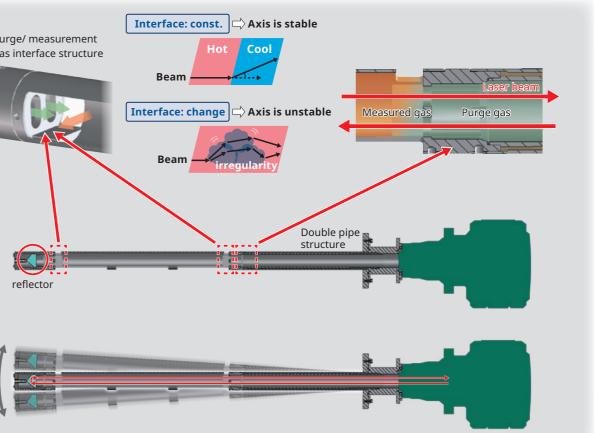

Easy replacement from gas sampling system

#### **High Reliability**

#### Long-term stable measurement

• Optical, hydrodynamics, thermal and vibration designed Probe to stabilize laser optical axis and optical path length for a long time

Reference cell • Internal reference cell in the laser module ensures peak locking during trace measurement (for O<sub>2</sub> and CO only)

#### Fired Heater Combustion, Safety, and Lifecycle

Yokogawa TDLS8100 O2 analyzer achieves;

- No Interference Analysis (TruePeak measurement technology)
- Internal reference cell for peak locking during trace measurement
