# LMK 458H

**Probe with** HART<sup>®</sup>-communication for Marine and Offshore

Ceramic Sensor

accuracy according to IEC 60770: 0.1 % FSO

#### **Nominal pressure**

from 0 ... 60 cmH<sub>2</sub>O up to 0 ... 200 mH<sub>2</sub>O

#### **Output signals**

2-wire: 4 ... 20 mA others on request

#### **Special characteristics**

- shipping approvals acc. to: Lloyd's Register (LR), Det Norske Veritas (DNV), China Classification Society (CCS), American Bureau of Shipping (ABS)
- diameter 39.5 mm ►
- HART<sup>®</sup> communication ► (setting of offset, span and damping)
- high overpressure resistance ►
- high long-term stability

#### **Optional versions**

- **IS-version** ► Ex ia = intrinsically safe for gas and dust
- diaphragm Al<sub>2</sub>O<sub>3</sub> 99.9 % ►
- different housing materials (stainless steel, CuNiFe)
- screw-in and flange version
- accessories e.g. assembling and probe flange, mounting clamp

The hydrostatic probe LMK 458H has been developed for measuring level in service and storage tanks and is certificated for shipbuilding and offshore applications.

A permissible operating temperature up to 85°C and the possibility to use the device in intrinsic safe areas enable to measure the pressure of various fluids under extreme conditions. The basis for the LMK 458H is a self-developed capacitive ceramic sensor element, which offers a high overload resistance and medium compatibility.

#### Preferred areas of use are

Water

drinking water abstraction desalinization plant

Shipbuilding / Offshore ballast tanks

draught monitoring level measurement in ballast and storage tanks

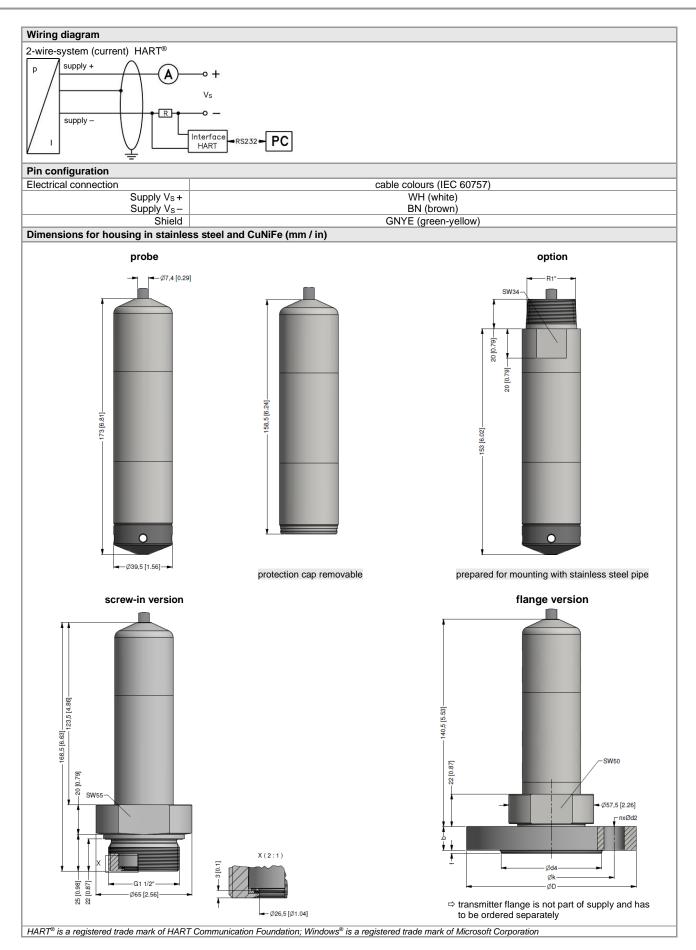

## LMK 458H

Probe for Marine and Offshore
