# Advanced

Digital Indicating Controller UT75A / UT55A / UT52A / UT35A / UT32A Program Controller UP55A / UP35A / UP32A Digital Indicator with Alarms UM33A

# Reliable and secure line

Welcome new members: 2-loop and DIN rail models,

**Configuration and Programming Software** LL50A **UITA**dvanced

# U Fallance d.

**Tools and** functions that go easy on your equipment

**Operation and** clear display that go easy on the user

**A** variety of functions, and easy-to-connect communication

Helpful ladder sequence control **function** 

Reliability

- RoHS/WEEE
- NEMA4\*/IP66 Front Panel \*Hose down test only.

### **Space saving options**

- 1/8th DIN 2-loop controller (UT32A-D)
- CC-Link communication available in a 48 x 96 mm (1/8 DIN) size
- 1/8th DIN Program controller (UP32A)
- DIN rail mounting controller (/MDL option)

### More UP55A program patterns

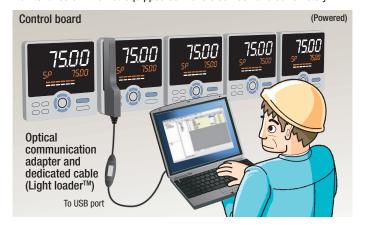

99 program patterns (/AP option)

# Tools and functions that go easy on your equipment

#### **Setting and managing parameters**

#### Easily edit settings from a PC while the unit is mounted on the controller board.

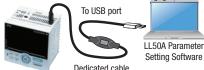

Settings are accessed through a dedicated adapter on the front panel. Maintenance of Ethernet-equipped controllers can be handled remotely.

- Set up parameters
- Controller data read/write/compare
- Data management
- Print parameters and data, and create reports
- · Configure user defaults

Set up right out of the box

No power cable required

#### LL50A contents: Light-loader adapter, Dedicated cable

With DIN rail mountable controllers (/MDL option), used to perform maintenance when powered.

Free software now available on the web for converting GREEN series parameters to UTAdvanced.

#### Can be supported with a single spare unit

**Universal Input and Output** 

#### Supports different sensors, heaters, and actuators

**Universal Inputs** 

**Universal Control Outputs** 

#### Gets you back home. Fast.

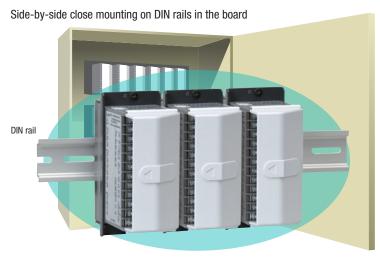

#### Shorter recovery time User defaults function

The LL50A lets you configure user default values.

Ever get lost in a maze of configuration changes? Now you can restore user-personalized default parameters. Recover quickly without disturbing operations.

#### Save space on the panel and control board

Status display (LED)

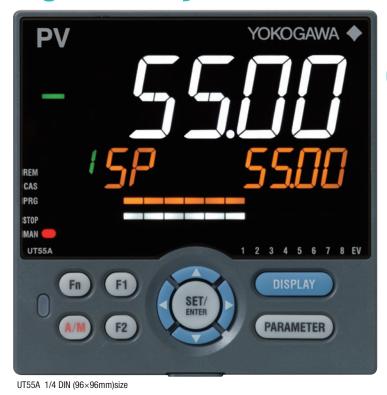

Green:Normal **Red:** Abnormal

- Ambient temperature: -10 to 50 °C (0 to 50 °C with CC-Link installed)
- 2-loop control in a single unit (UT32A-D/MDL)
- Displays controller and I/O status

UT32A/MDL UT52A/MDI UT32A-D/MDI

# Operation and clear display that go easy on the user

# **Bright & Easy to Read Active Color LCD Display**

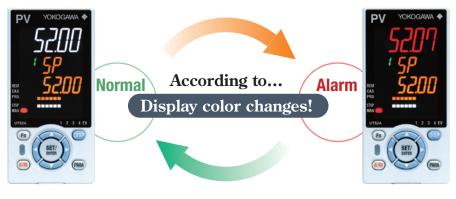

UT52A 1/8 DIN (48×96mm)size

#### **Active Color PV Display**

### See the status of your process conditions INSTANTLY!

- Alarms
- Deviation values
- Measured values
- Contact input
- · Choice of fixed white or red

#### Navigation guides and keys make it easy to operate

# Controller will guide the key you press. **Navigation Guide** Navigation Keys Move freely (up/down/left/right) between parameters!

#### **Fast one-touch operations**

#### **Programmable Function Keys**

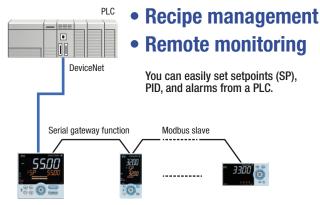

**UT** series

# A variety of functions, and easy-to-connect communication

#### **Communication protocol**

#### **Open Network**

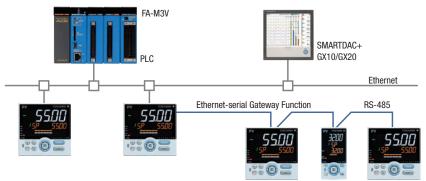

UTAdvanced with RS-485 communication

#### Space-saving built-in CC-Link models

• UT52A, UT32A, UM33A, UT52A/MDL, UT32A/MDL

#### Modbus/TCP

UTAdvanced with RS-485 communication

Modbus TCP, a protocol that allows the controller to connect to Ethernet network and have the ability to exchange data with the computers or devices on that network.

- Gateway function allows RS-485 Modbus devices to communicate via Ethernet.
- Physical layer: 10 BASE-T/100 BASE-TX
- Max. number of connection: 2

#### **Peer to Peer**

The use of the ladder sequence program makes it possible to exchange analog data and status data between communication-capable UTs.

Example: A UT in which an input error occurs sends a signal to another UT to enable that UT switch to MAN operation, thus shifting the whole system into a safe mode. In such a case, the safety mechanism can be built into the UTAdvanced and is not required in the host system.

\* Create ladder sequence programs by the LL50A Parameter Setting software (sold separately).

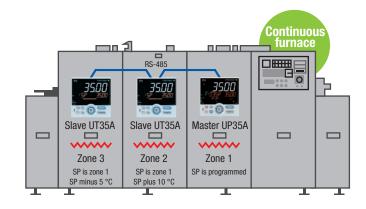

Up to 4 master units, total 32 units

#### **Coordinated operation**

Coordinated operation: This function syncs operation of the slave with that of the master through Yokogawa's proprietary communication protocol.

- Finely adjust the temperature setting of the slave with the bias and ratio
- Upstream PLC or other device not needed for tuning
- No programming means fewer engineering manhours

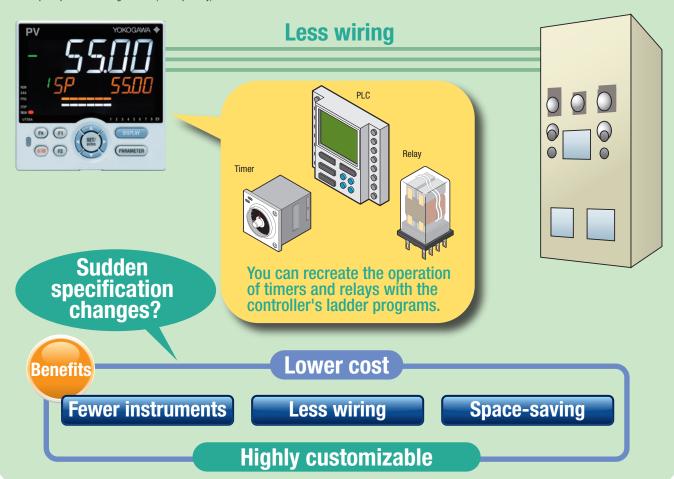

### Helpful ladder sequence control function

#### Flexibly adapts to the customer's requirements

Using the UTAdvanced ladder sequence control function offers a low-cost alternative for applications typically dependent on compact units such as PLCs, timers, and relays. Plus, it saves wiring labor and space. The ladder sequence control function supports the customized specifications of your customers.

\* Requires parameter setting software (sold separately).

#### **Example: Alarm annunciator**

#### How it works

- · Lamp blinks on alarm
- Lights while checking the active alarm
- · Goes out while checking stopped alarm

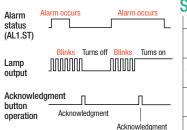

Check alarms with function keys

#### Example: On delay timer

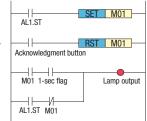

#### How it works

- Hold down the F1 key for 5 sec. or longer to turn relay ON
- · Release F1 key to turn relay OFF

### Digital Indicating Controller UT55A/UT52A (Standard model)

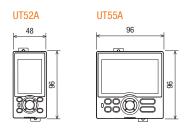

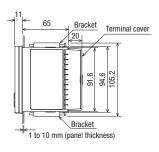

#### **Main Features**

- Up to 4 analog inputs available
- 3 alarm relays with independent common terminals
- 500 steps of ladder logic control
- Simple operation
- Up to 18 DOs (various combinations available)

#### **External Dimensions**

Unit: mm

| Model                    | Sı      | ıffix code | Optional<br>suffix<br>code | Description   |

|                          |         |            | 7 - 11                     | (1 additional aux. analog) input, 1 DI to be deleted (*4)                       |
| Optional suffix          | codes   |            | /LP                        | 24 V DC loop power supply (*5)  |
| opaonai ouinx            | 00400   |            | /HA                        | Heater break alarm (*6)   |
|                          |         |            | /DC                        | Power supply 24 V AC/DC   |
|                          |         |            | /CT                        | Coating (*7)  |

- I': When the Type 2 code is "1" or "6", only "0" can be specified for the Type 3 code.

  2: When the /LP option is specified, the RS-485 communication of the Type 2 code "1" or "2" is 2-wire system.

  3: English, German, French, and Spanish are available for the guide display.

  4: The /DR option can be specified when the Type 2 code is any of "1", "2", "4", "5", or "7."

  5: The /LP option can be specified when the Type 2 code is any of "0", "2", "3", or "4") and Type 3 code (any of "0" or "1"). Additionally the /LP option can be specified in the combination of Type 2 code "1" and Type 3 code "0".

  6: The /HA option can be specified in the Combination of Type 2 code "1" and Type 3 code "0".

  7: When the /CT option is specified, the UT55A does not conform to the safety standards (UL and CSA) and CE marking (Products with /CT option are not intended for EEA-market).

  \*3: The J/Dh option can be specified only when the Type 2 code is "2" and the Type 3 code is "0."

  \*4: The J/P option can be specified only when the Type 1 code is "-0" or "-1." Furthermore both Type 2 and Type 3 codes should be "0."

  \*5: The J/Ah option can be specified only when the Type 1 code is "-0" or "-1." Furthermore both Type 2 and Type 3 codes should be "0."

  \*6: When the /CT option is specified, the UTS2A does not conform to the safety standards (UL and CSA) and CE marking (Products with /CT option are not intended for EEA-market).

#### **Application examples**

### Digital Indicating Controller UT35A/UT32A (Standard model)

#### Main Features

- 4 target setpoints and PID sets available
- 3 alarm relays with independent common terminals
- . 300 steps of ladder logic control
- Simple operation

**External Dimensions** 

- Up to 8 DOs (various combinations available)
  - Maximum 4 points for alarm setting.

#### Optiona suffix code Digital Indicating Controller (Power supply: 100-240 V AC)(provided with retransmission output or 15 V DC loop power supply, 2 Dls, and 3 DOs) UT35A Type 1: Position proportional type Heating/cooling type None 2 additional DIs, 2 additional DOs Type 2:Functions 5 additional Dis, 5 additional DOs None RS-485 communication (Max.38.4 kbps, 2-wire/4-wire) NS-485 communication (Max.38.4 ktps, 2-wire/4-wire) Ethernet communication (with serial gateway function) CC-Link communication (with Modbus master function) PROFIBUS-DP communication (with Modbus master function) DeviceNet communication (with Modbus master function) DeviceNet communication (with Modbus master function) English (Default. - \*1: When / P option is specified, the RS-485 communication of the type 2 code "1" is 2-w
  2: The /MID\_topion is specified, the model and suffix codes are follows:
  UT32A-010-11-00/x/MDL
  UT32A-2003-11-00/x/MDL
  UT32A-210-11-00/x/MDL
- "3: When /MDL option and /LP option is combined, "3" can not be specified for Type 3 code.

  4: The /HA option can be specified only in the combination of Type2 code "1" and Type 3 code "0."

  5: When the /CT option is specified, the UTS2A does not conform to the safety standards (UL and CSA) and CE marking (Products with /CT
- option are not intended for EEA-market).

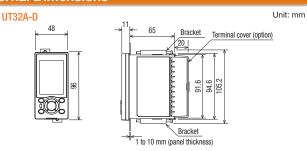

### Dual-loop Controller UT32A-D

#### Main Features

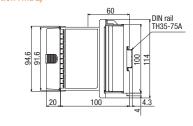

- Dual-loop control
- Space-saving
- Simple operation
- Ladder sequence programs can be built
- 3 alarms available as standard

#### **External Dimensions**

#### UT32A-D (with option /MDL)

ℴ

#### **Panel mounting**

- \*1: When Type 1 code is "-5", "3" cannot be specified for Type 2 code

- 1. When Type I Couler is ~3, 3 cannot be specified in it Type 2 cools.

  22 English and Spanish are available for the guide display.

  (3-Charlan and French guide displays are customized. Contact our representatives for inquiries.)

  (3-Charlan and French guide displays are customized. Contact our representatives for inquiries.)

  (3-Charlan and French guide Size 1, "2" or "3", the "CP" option can be specified.

  4-When the /CT option is specified, the UT75A does not conform to the safety standards (UL and CSA) and CE marking (Products with /CT option are not intended for EEA-market).

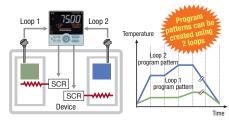

#### Enhancing Productivity by Managing a Variety of Recipes

#### **Switching between 20 Recipes**

#### **Program pattern operation**

- Program pattern consists of up to 20 segments
- 2-loop program pattern can be operated

#### Easy to switch between recipes with a PLC

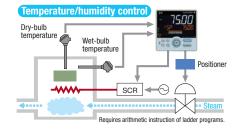

■ Since CC-Link, Profibus, and DeviceNet are supported, it is easy to link to a PLC that manages recipes

#### **Application examples**

#### 2-loop control with a single controller

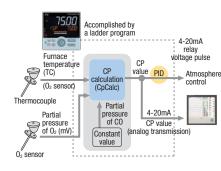

- 2-loop synchronous and independent operation is available
  - The start and stop instructions can be run synchronously or independently.
- Program pattern operation and constant value operation are available for 2-loop control
- A sequence can be run by combining the program pattern operation and fixed-point operation.

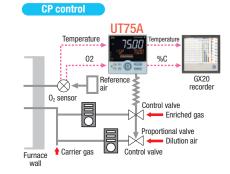

#### A variety of arithmetic instructions and large capacity ladder programs

- 15 basic instructions and 111 application instructions
- Ladder program capacity up to 1,000 steps
- Square root, exponential, and logarithmic calculations are available
- Temperature/humidity and CP calculations are available

#### **CP** control

### Program Controller UP55A (Standard model)

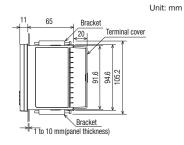

#### Main Features

- Up to 99 program patterns
- 8 PV events, 16 time events, and 8 alarms can be monitored simultaneously
- · Ladder sequence programs can be built
- Simple operation
- Up to 9 DIs and 18 DOs (combinations available)

### Digital Indicator with Alarms UM33A

#### **Main Features**

- Up to 9 alarm outputs (including one Fail)
- Input correction function (PV bias, polygonal line approximation, polygonal line bias)
- 24 VDC sensor power supply available
- Simple operation
- CC-Link communication support

| Model           | Suffix code                      |    | le C | Optional<br>suffix<br>code | Description   |  |

- : When /LP option is specified, the RS-485 communication of the Type 2 code "1" is 2-wire system.

- 2: Type 3 code 3" can be specified only when the Type 2 code is "0" or "2".

  3: English, German, French, and Spanish are available for the guide display.

  4: The I/P option can be specified only when the Type 2 code is any of "0", "1" or "2", and the Type 3 code is "0".

  5: When the I/CT option is specified only when the code for Type 2 code is any of "0", "1" or "2", and the Type 3 code is "0".

  5: When the I/CT option is specified, the UM33A does not conform to the safety standards (UL and CSA) and CE marking (Products with I/CT option are not intended for EEA-market).

#### **External Dimensions**

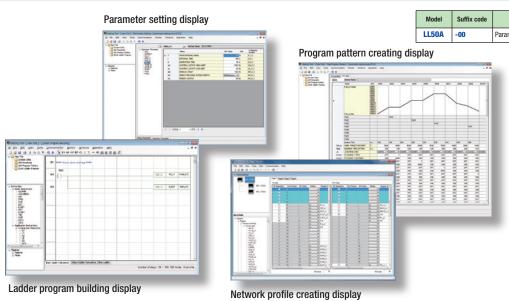

5 digits, 14-segment large LCD display with PV color changing function You can set the display to change colors during alarms.

#### **LL50A Parameter Setting Software**

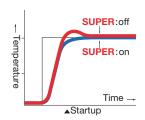

### **Main Features**

#### **SUPER Function suppresses overshoot**

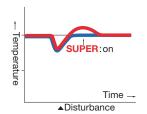

SUPER

The field-proven SUPER function utilizes a built-in operator experience and fuzzy theory to deliver fine control and suppress overshoot.

- . When wishing to suppress overshoot
- . When wishing to reduce the startup time
- · When load changes are significant
- . When setpoint is changed frequently

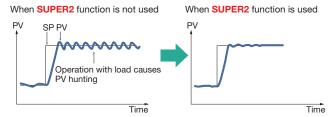

#### **SUPER2 Function suppresses hunting**

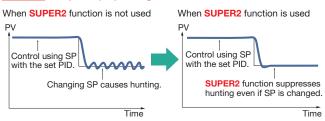

The new SUPER2 function utilizes a built-in operator experience and modern control theory to deliver fine control and suppress hunting.

- . With frequent load fluctuations
- With frequent external disturbances that take time to normalize
- When hunting still occurs after setpoint (SP) changes even if PID constants are set

#### Effect 1: Material change or load change with the same PID.

#### Effect 2: Setpoint (SP) change with the same PID.

#### Auto-Tuning (AT) Function

Autotuning is a function that evaluates process characteristics to automatically set optimal values relative to a target value that determines a PID constant. To implement autotuning, you can configure the following conditions.

• Two types of algorithms to calculate PID constants are available for selection.

Normal: Fast-rising PID constant Stable: Slow-rising PID constant

. High and low output limits can be set individually for control output values during AT runtime.

#### **Quick Setting Function**

Minimum parameters necessary for operation can be set.

#### **Security Function**

The password function can prevent inadvertent changes to the parameter settings. If a password is set, the password is required when moving to the Setup Parameter Setting Display. When the password is verified. can be changed to the Setup Parameter Setting Display.

#### **Message Function**

Using the message function and turning the contact input on/off, the message registered beforehand can be displayed on PV display by interrupt. The message is registered using LL50A Parameter Setting Software. The messages are limited to 20 alphanumeric characters. A maximum of four messages can be registered.

Operation Display

#### **CLOSE VALVE**

When the contact input is turned on the scrolling message registered beforehand is displayed on PV Display.

#### **Battery Free Memory Backup**

Nonvolatile memory is used for memory parameters backup. Service life is improved because no batteries, backup capacitors, or other components are used.

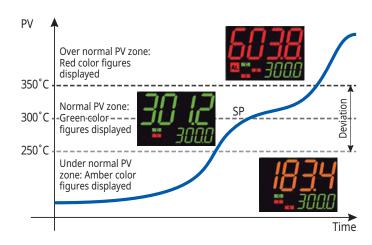

# **Related Instruments**

#### Temperature Controller TC10

#### **Small Cubic Controller**

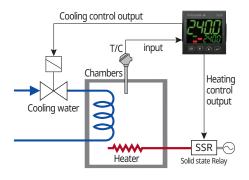

- Compact size (48 x 48 mm (1/16 DIN), depth 48 mm + 14 mm (terminals))
- Universal Input
- 3 colors active display
- Serial Communication

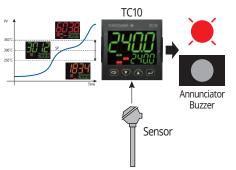

#### **Application**

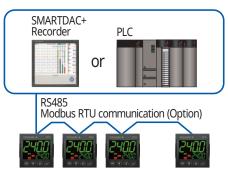

#### Heating and cooling (two outputs model)

#### Alarm detection with active display

#### Monitoring and setting from external device

General Specifications: GS05C01E81-01EN

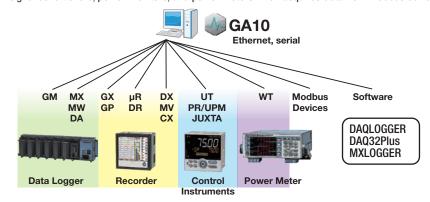

#### **Data Logging Software GA10**

#### Monitors and records data from a variety of instruments via networks

Broad support for data loggers, recorders, digital indicating controllers, signal conditioners, power monitors, and power meters. Even acquires data from Modbus devices.

#### **Specifications** (Overview)

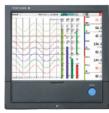

- Max. connectable units: 100
- Max. recording tags (channels): 2000
- Max. recording MATH tags (channels): 200
- . Max connectable clients: Unlimited (verified with 32)
- Scan interval: 100 ms or higher (using PC time). or scan interval of instruments (using instrument time)

General Specifications: GS 04L65B01-01E

#### Paperless Recorder SMARTDAC+GX10/GX20

Read/write measured data on other instruments via Modbus protocol.

Cover color (/BC option)

Modbus RTU (RS-422A/485 connection)

UTAdvanced series controlle

Modbus master The data of slave units can be displayed and saved on the GX/GP using the Modbus RTU function\*. \* Communication function option is required. Up to 16 slaves can be connected.)

General Specifications: GS 04L51B01-01E

#### RS232C/RS485 Converter ML2

The ML2 is a plugin type converter with 2 ports (RS-232C and RS-485) that performs isolation of communication signals, level conversion, and active control of drivers.

- Built-in RS-485 line termination resistance of 220  $\Omega$  (optional)
- Select auto or manual RS-485 driver active control
- . Change communication speeds from 300 to 38400 bps in 8 stages with a rotary switch
- Echo-back ON/OFF switch (2-wire types only)
- Switch between 2-wire and 4-wire on the RS-485 side

General Specifications: GS 77J04L02-01E

Welcom to our reliable and secure lineup.

Panel Mounting Type, DIN rail mounting type

UTAdvanced is a next-generation controller with greatly enhanced functions to meet the needs of customers in the field, worldwide.
