## **Operating Manual**

Digital Gauge

AX16-DM01, AX16-DM01-500, AX16-DM01-500 HD

## READ THOROUGHLY BE FORE USING THE DEVICE KEEP FOR FUTURE REFERENCE

ID: BA\_DM01X\_EX\_E | Version: 05.2022.0

## 1. General and safety-related information on this operating manual

This operating manual enables safe and proper handling of the product, and forms part of the device. It should be kept in close proximity to the place of use, accessible for staff members at anv time.

All persons entrusted with the mounting, installation, putting into service, operation, maintenance, removal from service, and disposal of the device must have read and understood the operating manual and in particular the safety-related information.

The following documents are an important part of the

operating manual:

- Data sheet

- Type-examination certificate For specific data on the individual device, please refer to the

respective data sheet.

Download these by accessing www.bdsensors.de or request them: info@bdsensors.de | phone.: +49 (0) 92 35 / 98 11 0 The explosion-proof versions of our products are variants of the

standard products.

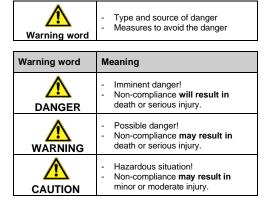

In addition, the applicable accident prevention regulations, safety requirements, and country-specific installation standards as well as the accepted engineering standards must be observed.

For the installation maintenance and cleaning of the device, the relevant regulations and provisions on explosion protection (VDE 0160, VDE 0165 and/or EN 60079-14) as well as the accident prevention regulations must absolutely be observed. The device was designed by applying the following standards:

EN 60079-0:2018

EN 60079-11:2012

# 1.1 Symbols used

NOTE - draws attention to a possibly hazardous situation that may result in property damage in case of non-compliance

✓ Precondition of an action

### 1.2 Staff qualification

Qualified persons are persons that are familiar with the mounting, installation, putting into service, operation, maintenance, removal from service, and disposal of the product and have the appropriate qualification for their activity.

This includes persons that meet at least one of the following three requirements:

addition, it has to be ensured, that this medium is compatible with the media wetted parts.

The technical data listed in the current data sheet are engaging and must absolutely be complied with. If the data sheet is not available, please order or download it from our homepage: http://www.bdsensors.de

## 1.4 Limitation of liability and warranty

Failure to observe the instructions or technical regulations, improper use and use not as intended, and alteration of or damage to the device will result in the forfeiture of warranty and liability claims

## 1.5 Safe handling

BD|SENSORS GmbH – All rights reserved

NOTE - Treat the device with care both in the packed and unpacked condition!

NOTE - The device must not be altered or modified in any

NOTE - Do not throw or drop the device!

- NOTE Excessive dust accumulation (over 5 mm) and
- complete coverage with dust must be prevented! NOTE - The device is state-of-the-art and is operationally

reliable. Residual hazards may originate from the device if it is used or operated improperly!

### 1.6 Safety technical maximum values

EU-type examination certificate: IBExU12ATEX 1108 X Device type: AX16-DM01 Identification: II 2G Ex ia IIB T4 Gb Standard variant for zone 1: With conductive front foil for zone 0: II 1G Ex ia IIC T4 Ga Ambient temperature range:

Display module: -10 ... 55 °C Transmitter module: -20 ... 70 °C (with 1G up to +60 °C) Power: 3x 1.5 V / AA: DURACELL Plus Power batteries

### 1.7 Scope of delivery

Check that all parts listed in the scope of delivery are included free of damage, and have been delivered according to your purchase order

- digital gauge (display / pressure sensor module)
- this operating manual
- accessories (option)

### 1.8 UL-approval (for devices with UL-marking)

The UL approval was effected by applying the US standards, which also conform to the applicable Canadian standards on safety

Observe the following points so that the device meets the requirements of the UL approval:

- only indoor use
- maximum operating voltage: see technical data - use only batteries with UL certification

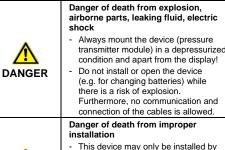

### 2. Product identification

The device can be identified by its manufacturing label. It provides the most important data. By the ordering code the product can be clearly identified.

BD SENSORS pressure measurement 95199 Thierstein, Germany www.bdsensors.de		
AX16-DM01	DM01-A2E	SN: 106340

NOTE - The type plate must not be removed!

3. Mounting 3.1 Mounting and safety instructions

NOTE - Take note that no inadmissibly high mechanical stresses occur at the pressure port as a result of the installation, since this may cause a shifting of the characteristic curve or to the demage

 $\ensuremath{\textbf{NOTE}}$  - The permissible tightening torque depends on the conditions on site (material and geometry of the mounting point). The specified tightening torques for the device must not be

NOTE - In hydraulic systems, position the device in such a way that the pressure port points upward (venting).

NOTE - Provide a cooling line when using the device in steam

NOTE - If the device is installed with the pressure port pointing upwards, ensure that no liquid drains off on the device. This could result in humidity and dirt blocking the gauge reference in the housing, and could lead to malfunctions. If necessary, dust and dirt must be removed from the edge of the screwed joint of the electrical connection.

## NOTES - for mounting outdoors or in a moist environment:

- Please note that your application does not show a dew point. which causes condensation and can damage the device. There are specially protected devices for these operating conditions. Please contact us in such case.
- Connect the device electrically straightaway after mounting or prevent moisture penetration, e.g. by a suitable protective cap. (The protection rating specified on the data sheet applies to the connected device.)
- Select the mounting position such that splashed and condensed water can drain off. Stationary liquid on sealing surfaces must be excluded!
- Mount the device such that it is protected from direct solar radiation. In the most unfavourable case, direct solar radiation leads to the exceeding of the permissible operating temperature. This must be excluded if the device is used in any explosion-hazardous area!
- A device with gauge reference in the housing (small hole next to the electrical connection) must be mounted such that the gauge reference is protected against dirt and humidity. If the reference will be blocked, and the equalization of air pressure will be prevented. In this condition, a precise measurement is impossible and damage to the transducer may occur.

## 3.2 Conditions for oxygen applications

<u>/!\</u>

Make sure that your device was ordered for oxygen applications and delivered accordingly. (see type plate - order code ends with the numbers "007")

Unpack the device directly prior to the installation. Skin contact during unpacking and installation must be avoided to prevent fatty residues remaining on the device. Wear safety gloves!

The entire system must meet the requirements of BAM (DIN 19247)!

For oxygen applications > 25 bar, transducer types without seals are recommended.

Transmitters with o-rings of FKM Vi 567: permissible maximum values: 25 bar / 150° C (BAM approval)

### 3.3 Mounting steps for connections according to DIN 3852

NOTE - Do not use any additional sealing material such as yarn, hemp or Teflon tape!

 $\checkmark$   $\,$  The O-ring is undamaged and seated in the designated

- groove. The sealing face of the mating component has a flawless surface. (Rz 3.2)
- Screw the device into the mating thread by hand.
- 2 Devices equipped with a knurled ring: only tighten by hand
- 3 Devices with a wrench flat must be tightened using a suitable open-end wrench. Permissible tightening torques for digital gauge: G1/4": approx. 5 Nm; G1/2": approx. 10 Nm; G3/4":approx. 15 Nm; G1": approx. 20 Nm

#### 3.4 Mounting steps for connections according to EN 837

- ✓ A suitable seal for the measured fluid and the pressure to be measured is available. (e.g. a copper seal)
- $\checkmark$  The sealing face of the mating component has a flawless surface. (Rz 6.3)
- Screw the device into the mating thread by hand. Then tighten it using an open-end wrench. Permissible 2
- tightening torques for digital gauge: G1/4": approx. 20 Nm; G1/2": approx. 50 Nm

## 3.5 Mounting steps for NPT connections

- ✓ Suitable fluid-compatible sealing material, e.g. PTFE tape, is available.
- Screw the device into the mating thread by hand
- Then tighten it using an open-end wrench. Permissible

tightening torques for digital gauge: 1/4" NPT: approx. 30 Nm; 1/2" NPT: approx. 70 Nm

 $\ensuremath{\textbf{NOTE}}$  - The specified tightening torques must not be exceeded!

Connect display with pressure sensor module as follows: bring together carefully the display with the pressure

press the display hand-tight onto the pressure sensor

 $\ensuremath{\textbf{NOTE}}$  - Before disconnecting display and pressure sensor

NOTE - While the data logger is active, display and pressure

Before initial start-up the insulation foil has to be removed. Carry out steps 1 - 3 and 5 in this regard.

As soon as in the display the announcement of "battery" is

remove the insulation foil before initial start-up

exchange the batteries (3 x 1.5 V AA

approvals: 1.5V / AA DURACELL Plus Power Battery

 $\ensuremath{\textbf{NOTE}}$  - Make sure that the batteries are connected

lock the device after that properly

shown, a battery change is required. Follow steps 1, 2, 4,

1 unscrew three fixing screws with a suitable screwdriver

NOTE - An incorrect usage may cause a leak out of batteries

 $\ensuremath{\textbf{NOTE}}$  - Use only the following batteries that have Ex and UL

NOTE - Never combine batteries of different types or old

correctly with the corresponding contacts in the battery tray.

 $\ensuremath{\textbf{NOTE}}$  - Keep the batteries away from heat and unshielded

- They know the safety concepts of metrology and automation technology and are familiar therewith as project staff.
- They are operating staff of the measuring and automation systems and have been instructed in the handling of the systems. They are familiar with the operation of the devices and technologies described in this documentation.
- They are operating staff of the measuring and automation systems and have been instructed in the handling of the systems. They are familiar with the operation of the devices and technologies described in this documentation.

All work with this product must be carried out by qualified personsl

### 1.3 Intended use

The battery powered digital gauge has been designed for extremely high demands in the sector of calibration and test technology. It can be easily and quickly installed in situ.

This operating manual applies to devices with explosion protection approval and is intended for the use in IS-areas. A device has an explosion-protection approval if this was specified in the purchase order and confirmed in our order acknowledgement. In addition, the manufacturing label includes a 🗟 sign.

The user must check whether the device is suited for the selected use. In case of doubt, please contact our sales department: info@bdsensors.de | phone: +49 (0) 92 35 / 98 11 0 BD|SENSORS assumes no liability for any wrong selection and the consequences thereof!

Permissible media are gases or liquids, which are compatible with the media wetted parts described in the data sheet. In

qualified technical personnel who h read and understood the operating manual!

Do not use the display to tighten or solve to the mechanical connection of the pressure transmitter module

NOTE - Operation of the display AX16-DM01 with the EC-Type Examination certificate IBExU12ATEX1108 X is permitted only in combination with the accompanying pressure transmitter with the EC-Type Examination certificate IBExU10ATEX 1026U!

NOTE - If both equipments have not been used in the scheduled combination (display AX16-DM01 / pressure transmitter with certificate IBExU10 ATEX 1026 U), then the complete system has to be put immediately out of operation! A potentially damage of one or both devices could have been occurred! The device(s) consequently lose the IS-certification when using not for intended purpose!

NOTE - Handle the unprotected diaphragm very carefully - it is very sensitive and may be easily damaged.

**NOTE** - To avoid damaging the diaphragm, remove packaging and protective cap only directly before starting up the device. A delivered protective cap must be stored!

**NOTE** - Place the protective cap on the pressure port again immediately after disassembling.

NOTE - Do not use any force when installing the device to prevent damage of the device and the plant!

**NOTE** - Never use the display as a mounting / dismounting aid, otherwise the device or the plug-in connections will be irreparably damaged. For mounting or dismounting the device, only use the hexagon on the pressure port.

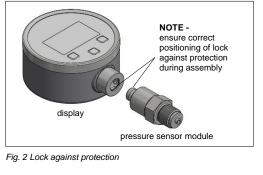

3.6 Mounting steps for internal threads M20x1.5 and 9/16" UNF (for DM01-500 HD)

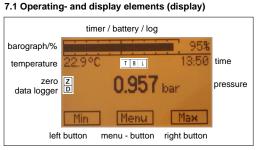

NOTE - The high-pressure tube will seal metal-to-metal in the chamfer of the pressure port. (sealing cone 60°)

- Screw the high-pressure fitting into the internal thread of 1 the device.
- 2 Then tighten it using an open-end wrench. The required tightening torque depends on the manufacturer's specifications for the high-pressure pipe you are using. (permissible tightening torque for device

## 4. Connecting display / pressure sensor module

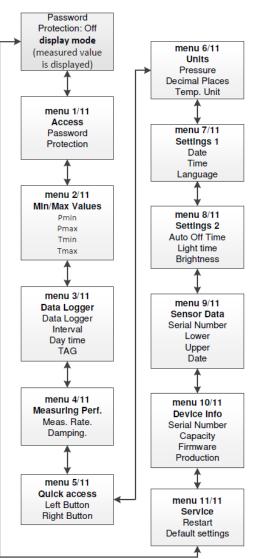

## Fig.4 Display and operating foil

The display of the measuring value as well as configuring the single parameters occurs menu-steered about a LC display capable of graphic arts. The single functions are regulated on the basis of three-front-sided arranged push buttons.

The menu system is closed, thereby one can "browse" forward as well as backward by the single setting menus to reach to the desired setting point.

### 9. Removal from service

**NOTE** - After dismounting, mechanical connections must be fitted with protective caps.

## 10. Service / repair

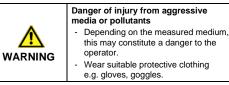

Information on service / repair:

- www.bdsensors.de
- info@bdsensors.de
- Service phone: +49 (0) 92 35 / 98 11 0

### 10.1 Recalibration

During the life-time of a transmitter, the value of offset and span may shift. As a consequence, a deviating signal value in reference to the nominal pressure range starting point or end point may be transmitted. If one of these two phenomena occurs after prolonged use, a recalibration is recommended to ensure furthermore high accuracy.

### 10.2 Return

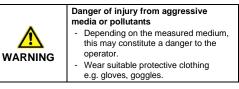

Before every return of your device, whether for recalibration, decalcification, modifications or repair, it has to be cleaned carefully and packed shatter-proofed. You have to enclose a notice of return with detailed defect description when sending the device. If your device carme in contact with harmful substances, a declaration of decontamination is additionally required.

Appropriate forms can be downloaded from our homepage. Download these by accessing www.bdsensors.de or request them:

info@bdsensors.de | phone: +49 (0) 92 35 / 98 11 0

In case of doubt regarding the fluid used, devices without a declaration of decontamination will only be examined after receipt of an appropriate declaration!

## 11. Disposal

X

The device must be disposed of according to the European Directive 2012/19/EU (waste electrical and electronic equipment). Waste equipment must not be disposed of in household waste! **NOTE** - Dispose of the device properly!

#### 12. Warranty terms

The warranty terms are subject to the legal warranty period of 24 months, valid from the date of delivery. If the device is used improperly, modified or damaged, we will rule out any warranty claim. A damaged diaphragm will not be accepted as a warranty case. Likewise, there shall be no entitlement to services or parts provided under warranty if the defects have arisen due to normal wear and tear.

## 13. EU Declaration of conformity / CE

The delivered device fulfils all legal requirements. The applied directives, harmonised standards and documents are listed in the EC declaration of conformity, which is available online at: http://www.bdsensors.de.

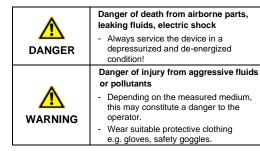

Additionally, the operational safety is confirmed by the CE sign on the manufacturing label.

IS EQUI is exited. 2014/30/EU (EMC) 2011/85EU (RoHS) Py ">>". Für Getäte mit Ex-Zulassung For Gereise with 15 approver

- Changes are only effective after pressing the menu button "Next" and after leaving the menu item. When leaving the entire menu system, the set parameters are checked again in relation to each other and in relation to the characteristics of the device. When configuring the unit, the measuring range is converted into the new unit only after leaving the menu system. Depending on the pressure range, not all units may be used.

### 8. Maintenance

If necessary, clean the housing of the device using a moist cloth and a non-aggressive cleaning solution.

The cleaning medium for the media wetted parts (pressure port / diaphragm / seal) may be gases or liquids which are compatible with the selected materials. Also observe the permissible temperature range according to the data sheet.

Deposits or contamination may occur on the diaphragm / pressure port in case of certain media. Depending on the quality of the process, suitable maintenance intervals must be specified by the operator. As part of this, regular checks must be carried out regarding corrosion, damage to the diaphragm and signal shift.

If the diaphragm is calcified, it is recommended to send the device to BD SENSORS for decalcification.

**NOTE** - Wrong cleaning or improper touch may cause an irreparable damage on the diaphragm. Therefore, never use pointed objects or pressured air for cleaning the diaphragm.
